

PROGRAM OF THE NEOBYZANTINE MOVEMENT

(in general)

- The Neobyzantine Movement (NBM) is an international organisation of groups and individuals (as described in the [Statute of the Movement](#)) that promotes and stimulates renewal of old-Byzantine (Ρωμαϊκή) tradition and culture. All the people of the ancient Byzantine cultural and economical influence identified themselves as Byzantines (Ρωμαίοι), and the NBM believes the term should be used these days as well, for all the Byzantine nations (*nations that do belong to Orthodox religion and nations of the old-Byzantine cultural sphere of influence including those who don't necessarily belong to Orthodox belief but were neighbours or part of the old-Byzantine world*).
- NBM supports an idea that every Byzantine and a person of an Orthodox Faith belongs to a unique cultural type and should live together. Therefore, NBM will support any kind of union, confederation, or any other kind of grouping of states that do belong to the Byzantine world.
- NBM will strongly support an idea of Balkan Union, Union of Byzantine states on Caucasus, Levantine, Mediterranean, and Palestine. NBM will support and agitate creation of Byzantine Group of States in the United Nations (UN) and in the European Union (EU), and will support integration of Byzantine States into all the most relevant political and economical groups in the world. In spite of that, NBM will urge the government of every Orthodox and Byzantine state to create unique standards, law system, economical groups and centres, defence forces, and administrative centres among these nations.
- NBM will fight against any kind of occupation, terrorism, repression or violence on Orthodox and Byzantine people wherever it takes place. That is why we urge the Byzantine and Orthodox Nations to create common Council of National Defence, Security and Stability to fight terrorism and violence on Orthodox, Byzantine and Eastern Christian people.
- The main goal of the NBM is creation of the New Byzantine State (Νέο Βυζάντιο - Νέα Ρωμαιο) as described in the [Idea of Neo Byzantio](#)) and Union of every Byzantine and Orthodox nation in the world. As the NBM is concerned, the capital city of the future state would be Constantinople, as it has been during thousands of years of Byzantine and Hellenic history.
- NBM supports groups that have ecological views and are striving to preserve and heal the Earth, the climate, and the ecosystem. The NBM will help these groups whenever it is necessary and possible.
- NBM will contribute in the humanitarian and charity activities to the people in trouble, especially to the people of Byzantine states and of Orthodox Faith, but to all the others as well.
- NBM will help the activities on the economical development of Byzantine States, their integration and the creation of one single, Byzantine market. Because of the cultural ties between our countries, it is in our best interest to develop single trade market, to cooperate and offer products and services on a global scale, thanks to our mutual understanding and knowledge of customs, traditional values and Faith, which are basically the same in all the Byzantine States.
